-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of Fig. 2 in the reply filed on March 29, 2005, is acknowledged. The traversal is on the grounds that the two inventions are allowable and similar. This is not found persuasive. Nevertheless, all of the claims read on the elected species.

The requirement is still deemed proper and is therefore made FINAL.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Laveau (3,648,714), which shows all of the claimed limitations. Laveau shows, among other things, a burner fuel mixer head I, comprising a primary housing 1 having a fuel/air mixing chamber 26 with a mixed fuel gas inlet 2,3, a combustion air inlet 4, and a mixed fuel/air outlet 26a communicating with the fuel/air mixing chamber, a secondary housing (see at least fig. 2) having a fuel mixing chamber with a pressurized fuel gas inlet 34,35

Art Unit: 3749

and a low pressure fuel gas inlet 34,35, the fuel mixing chamber of the secondary housing communicating with the mixed fuel gas inlet leading into the primary housing, a venturi throat 25 with converging sidewalls positioned in the mixed fuel gas inlet, a venturi nozzle 22 communicating with the pressurized fuel gas inlet, a first end of the venturi nozzle extending into the fuel mixing chamber in axial alignment with the venturi throat to form a venturi, such that the apparatus is capable of providing a pressurized flow of pressurized fuel gas through the venturi draws low pressure fuel gas from the fuel mixing chamber of the secondary housing through the mixed fuel gas inlet into the fuel/air mixing chamber of the primary housing. Laveau further shows the venturi nozzle adjustable via a lug nut.

### ***Prior Art***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references disclose fluid mixers with many, if not all, of the claimed components. Nevertheless, in order to avoid overburdening the applicant with redundant rejections, these references were not applied.
